

EMCOR Services Walker-J-Walker

Planned & Preventive Maintenance: Peace of mind you can depend on

We sustain life in existing structures by maintaining the sophisticated and dynamic systems that create productive, high performance facility environments.

By helping to ensure optimum system reliability, reducing downtime and unexpected repair costs, and providing long-term investment protection, our preventive maintenance services give you peace of mind, while playing a vital role in your business success.

When you think of us, think job done, requirements surpassed.

EMCOR Services Walker-J-Walker is a licensed HVAC maintenance service, building automation, and retrofit contracting company serving the greater Memphis area.

We have earned a reputation for providing value to our many satisfied customers through high-quality consulting services and efficient, cost-effective, customized installed solutions.

We are committed to helping our clients get the most out of their equipment and facilities for their full lifecycle, which is why we offer comprehensive maintenance programs, commissioning, code compliance and testing, as well as energy retrofits, high efficiency building automation systems, and much more. All of these services are packaged in our innovative design-build methodology and delivered by a team of professional technicians and certified engineers.

Add EMCOR's financial strength and knowledge transfer network, and you have a company that can meet your needs from one end of the critical path to the other, no matter how exacting the standards or rigid the specifications.

Think bottom-line performance

Walker-J-Walker offers a full range of planned preventive maintenance services, all aimed at giving you bottom-line value. These services include:

- » Scheduled inspections tailored to your system and business requirements
- » Testing and timely replacement of all air filters, belts, cleaners, oil filters, and lubricants
- » Up-to-date maintenance records, including combustion efficiency reports, technician recommendations, refrigerant usage, and more
- » Professional engineering assistance
- » Complete and accurate repair quotes
- » Preferred customer service 24/7/365

Preventive maintenance activities like these keep your systems running efficiently, to help ensure consistent occupant comfort and productivity with minimal downtime and fewer repairs. At the same time, they extend your equipment's life for maximum return on your facility investment. The result is systems that support your business instead of draining your bottom line.

Experts who keep your systems running flawlessly—so you can concentrate on your core business.

Our fully licensed and certified team of experts undergo continuous training so that they are always up to date on today's leading-edge equipment and service techniques. They use state-of-the-art testing, calibrating, balancing, and other tools to tune your systems for optimum operation, reliability, and energy efficiency.

It all adds up to flawless performance, so you can do your job without doubts, worries, or downtime.
